Implementation

Due to physical limitations, we are unable to present the game within this zip bundle. However, the built game executable (and attatched data folder) is hosted on our website at https://goo.gl/6BZTwz and source files (with an additional file guide) are available at https://goo.gl/9o6pUY and the Git repo is available at https://github.com/HenryCadogan/Clued-Up. A report on the architecture of the game can be found at http://wedunnit.me/webfiles/ass2/Arch2.pdf.

Missing Features

We have implemented all of the features as specified in our requirements. Please note that as Requirements 14 and 15 rely heavily on the implementation of a score feature, which was declared out of scope in the brief for Assessment 2, we have deemed them outside of scope as well.
